For personal use only.

bkg	background
it1	inner triangle, lighter
it2	inner triangle, darker
ot	outer triangle

If you are planning to join windblown square to windblown square, it is suggested to alternate the blocks by turning them, putting a vertically-seamed next to a horizontally-seamed. This cuts down the number of seams to match, but it also changes the color orientation of the interior triangles, so do a dry run and check whether you want this before sewing together.
